Conceptual framework

|

Description / Abstract

The Plenary requested the development of a conceptual framework to give cohesion to the objective, functions and relevant operating principles of the Platform and the relationship among them. Such conceptual framework needed to provide an integrated view of the biodiversity knowledge-policy interface, stimulate new thinking, accommodate diverse human attitudes to biodiversity, and at the same time be as simple as possible to be effective and useful for the diverse array of stakeholders. The conceptual framework adopted by IPBES rises to this challenge.
