Rees, Judith Winpenny, James Hall, A.W.

Description / Abstract

GWP Technical Background Paper No. 12

There is a very close link between the integrated approach, good water governance and financing but, to date, there has been little discussion about this relationship. This paper aims to bring together these different strands so that a more coordinated, coherent approach to water financing is adopted. It focuses on the need to fund the water resources functions that are essential for security and sustainability.
